Schema Validation Rules
Schema Validation Rules

• Agent TAIN validation to include a verification check.
• Address fields to be updated to cater for non-Irish addresses.
• Possible data protection issue if Date of Birth remains mandatory. To be considered.
• Pay frequency values to be reviewed.
• Certain PRSI classess may be redundant. DSP will provide information on class and subclass to be included
Schema Validation Rules

• Insurable weeks can be negative
• If insurable weeks = 0, PRSI class and subclass are not mandatory
• The field ‘Expected number of pay periods in a full year’ to be reviewed
Data Items
Data Items

• There will be a cap on the number of RPIs that can be requested at one time. **Revenue** considering this at the moment.

• If an employment reference number is provided by the employee, it will be included on RPI.

• It was asked if there will be delays in responding to PREM registration requests. **It is possible to register for PREM online.**

• A count of ‘No RPIs’ to be included in response to request for RPI.
Other
Other

• Consider changing the term ‘payslip’ to ‘payee’ to avoid confusion
• Illness Benefit to be included on new RPI by reducing credits and standard rate bands, similar to Maternity Benefit.
• There will be a new column on the 2018 P2C bulk issue to include previous PPSN (i.e W number). This will assist with the data alignment process
Other

- Consider what affect a change in pay frequency during the year has on credits available.

Example of individual changing pay frequency to be included
