UK port operating model

Map of Port Customs Models and Infrastructure

This lists a selection of border locations and provides a general indication of their proposed customs control models. This is subject to change and final approvals. A comprehensive list of border locations that will operate the pre-lodgement model will be published later in the year once formal approvals are in place.

Information around the border locations using Goods Vehicle Movement Service (GVMS) to support Offices of Transit digitally, is available here.

For more information on the two main customs processes that goods can be imported into, and which process applies - **see Section 3.1.3 (Variation by Location of Entry).**

Temporary Storage Ports		Accompanied Freight GVMS
2	Port of Tyne	√
3	Teesport	√
4	Hull	√
5	Killingholme	√
