Click on "Click to browse for a file" (or you can use the drag and drop option if you prefer).

## Manage My Certificates

**1. Choose your certificate here:** ⓘ

Search for a certificate (.p12 file)  
on your computer

Drop a file here to upload, or  
[Click to browse for a file](#)

Loaded certificates will be displayed here: ▾ [Save](#) [Remove](#)

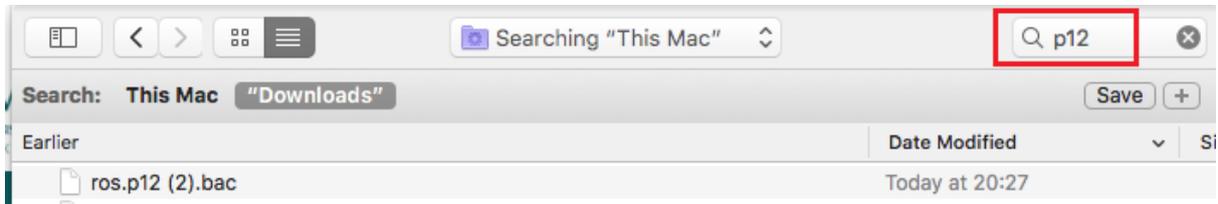

You currently have no certificates loaded in your browser.

**2. Enter Password**

On the next screen, type p12 into the search field.

When the search is complete, identify the most recent file for your certificate from the Date Modified – it will be either a .p12 file or a .p12.bac file.

Double click on this file.

The certificate file name should now be displayed underneath the “Click to browse for a file” link. Type your ROS login password into the password box and click the “Load Certificate” button.

---

**1. Choose your certificate here:** ⓘ

Search for a certificate (.p12 file)  
on your computer

Drop a file here to upload, or  
[Click to browse for a file](#)

**ROS.p12.bac**

Loaded certificates will be displayed here: ⌵ Save Remove

You currently have no certificates loaded in your browser.
