1. Introduction

Animals and products of animal origin, including hay and straw, being imported into the EU must undergo controls before entry into free circulation is permitted (see Section 6 for relevant legislation). In Ireland, the competent authority for carrying out these controls is the DAFM (Department of Agriculture, Food and the Marine). Revenue's Customs Service assists in the implementation of these controls by referring relevant consignments to DAFM prior to release for entry into free circulation.

For the purposes of this legislation, the term 'importation' means the movement of goods and live animals into Ireland from countries other than EU Members States, Andorra, Liechtenstein, Norway, San Marino or Switzerland and in the case of fishery products, the Faroe Islands or Iceland.

2. Prohibition/Restriction

Consignments of live animals and products of animal origin being brought into the EU must be imported at an approved BCP (Border Control Post). The following locations are designated as BCPs and only those products/animals listed can be imported through these stations:

- **Dublin Port**
 - products of animal origin (Packed and Unpacked)
 - equidae
 - ungulates (excluding livestock, ovine, bovine, caprine and porcine animals)
 - other animals
- **Dublin Airport**
 - packed products of animal origin
 - horses
 - pigs
 - commercial movements of cats, dogs and ferrets
 - lagomorphs
 - rodents
 - live fish, birds, reptiles and amphibians
 - invertebrates
- **Shannon Airport**
 - packed products of animal origin
 - horses

- **Rosslare Europort**

- products of animal origin (packed and unpacked)
- equidae
- ungulates
- other live animals

Official controls on relevant consignments must be carried out at the BCPs by DAFM before entry into free circulation is allowed. A list of DAFM (BCPs) contacts can be found in the [Annex](#) to this manual.

Where there is an attempt to import live animals or products of animal origin at an entry point other than an approved BCP, Customs should detain the consignment and inform DAFM. DAFM will advise the importer of the correct procedure to follow. Customs will be kept informed of the outcome by DAFM.

The following material is either exempt from or not required to be published under the Freedom of Information Act 2014.
