5. Appendix I – ROS Registration & Reporting Entity Registration

5.1 Register for ROS

This step is only relevant if the Customer is not already registered for ROS.

The Customer must register for ROS using the Tax Registration Number provided by Revenue. If the Customer does not have a Tax Registration Number but has a FATCA Reporting Obligation in Ireland please see Section 5.2 in order to obtain a Reporting Entity Number.

Details on how to register for ROS are available on the [Revenue website](#).

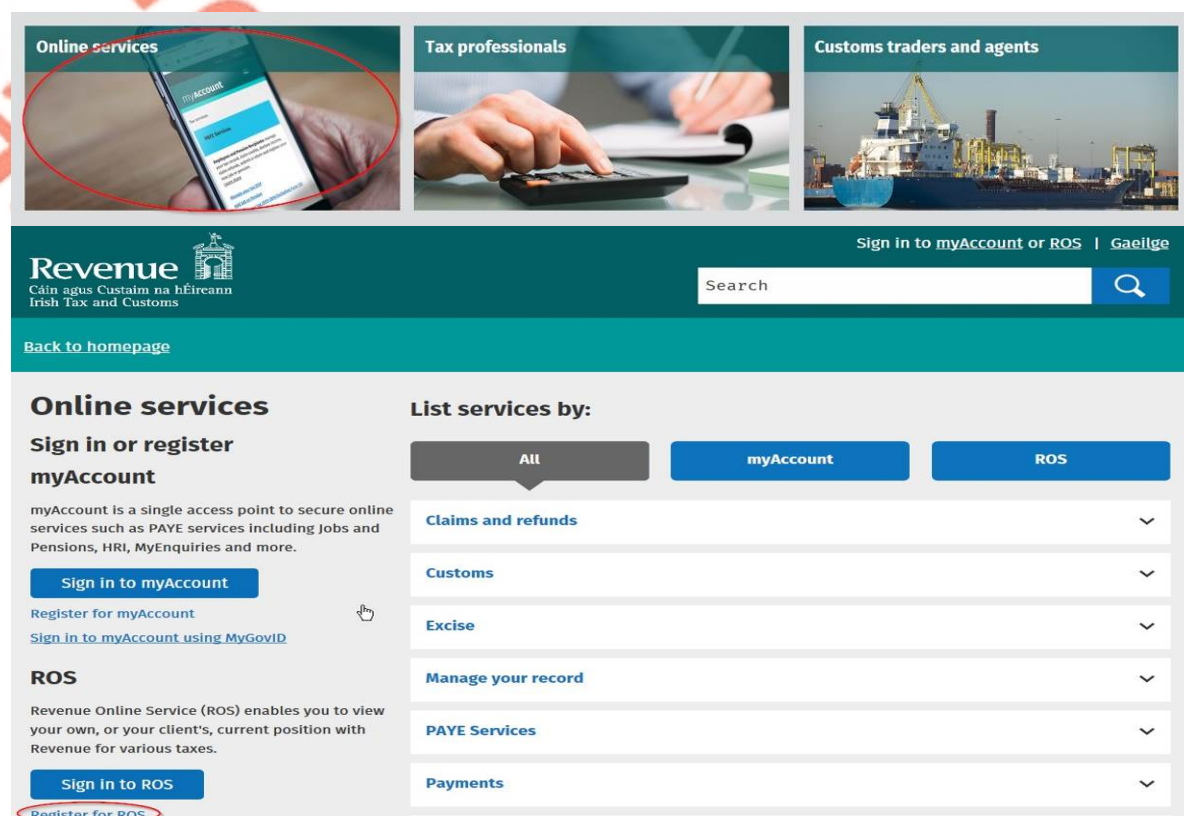

Figure 72: Revenue website screen

For queries relating to ROS please contact the Revenue ROS Technical Helpdesk:

- Email at roshelp@revenue.ie
- Telephone at **01 738 3699**, International customers may contact via the email address above or call **+353 1 738 3699**

5.2 Register as a Reporting Entity

This is a Customer that is only being registered with Revenue in order to file Reporting Obligations (i.e. they have no tax obligations in Ireland).

If the Customer does not have a Tax Reference number and is not registered for ROS, but is obliged to fulfil a FATCA Reporting Obligation, the Customer must register with Revenue as a '**Reporting Entity**'. This process should not be confused with a Tax Registration. Where a Customer registers as a Reporting Entity, it will only be able to fulfil its FATCA Reporting Obligations, that is, it is not required to file tax returns e.g. Corporate Tax returns.

In order to register as a Reporting Entity, the Customer must contact VIMA on +353 42 9353337. The Customer will be issued with a Reporting Entity Registration Number, which will be in the format of 7 digits followed by 2 letters (e.g. 1234567AA).

6. Appendix II – Agent Creating Reporting Entity Number

6.1 Creating a Reporting Entity as an Agent

A Reporting Entity is created only in cases where the Customer has no tax obligations in Ireland but needs to register with Revenue in order to fulfil their Reporting Obligations.

If the Customer does not have a Tax Reference Number and is not registered on ROS but is obliged to register on ROS to fulfil a FATCA Reporting Obligation, the Agent must register the Customer with Revenue as a **'Reporting Entity'**. This process should not be confused with a Tax Registration. Where a Customer is registered as a Reporting Entity, the Customer will only be able to fulfil its FATCA Reporting obligations, that is, the Customer is not required to file tax returns e.g. Corporate Tax returns. Where a Client already has an Irish Tax Registration Number or Reporting Entity Number, this option should not be used as it will create duplicate filing obligations.

When an Agent is registering a Customer as a Reporting Entity for FATCA Reporting purposes, it is possible for an Agent to register a FATCA Reporting Obligation at the same time. The process is set out in steps 6.1.1 to 6.1.12 below.

For queries relating to ROS please contact the ROS Technical Helpdesk:

- Email at **roshelp@revenue.ie**
- Telephone at **01 738 3699**, International customers may contact via the email address above or call **+353 1 738 3699**

For queries relating to registering a Reporting Obligation, please contact Revenue's VIMA (VIES, Intrastat and Mutual Assistance) office:

- Via **MyEnquiries**, selecting **AEOI (Automatic Exchange of Information) and FATCA**
- Telephone at **+353 42 9353337**

7. Appendix III – FATCA Additional Schema Guidance

Following the first filing of FATCA returns and exchange with the United States, Revenue wishes to advise Financial Institutions (FI) of the following changes to file validation, which will be applied to the filing Financial Institution of FATCA 2015 financial account information in 2016, and to subsequent filings.

Financial Institutions should note that Revenue will allow a standard naming convention and an alternative naming convention. Financial Institutions should apply one or other of these naming conventions and the two naming conventions cannot be mixed. For example, where a Financial Institution chooses the alternative naming convention for the MessageRefID element (as illustrated at 7.2 below), the alternative naming convention for the DocRefID element (as illustrated at 7.4) must also be used. This is to ensure compliance with the IRS validation of the DOCREFID which must start with the GIIN and followed by a full stop.

FATCA Returns should be based on the [FATCA XML SCHEMA GUIDE \(V2.0\)](#)

7.1 XML schema element reference – MessageRefID

One of the main issues experienced with rejected FATCA XML files was in relation to this field. FI's failed to populate this field or included a reference which was duplicated in other files. Each FATCA XML file submitted by an FI should have a unique value in this field.

For FATCA files submitted to Revenue since 2016, the following naming convention should be applied for the MessageRefID field:

Element	MessageRefID
Datatype:	xsd: string
Pattern:	<Reporting FI GIIN>.<Reporting Year>_<Unique Sequence ID>
Description:	<ul style="list-style-type: none"> • <Reporting FI GIIN> is the GIIN for the reporting FI associated with the reporting group • Period character (.) • <Reporting Year> is the 4-digit reporting year that the data in the file relates to • Underscore • <Unique 4-digit Sequence ID> is a sequence id for each file being uploaded to Revenue. The first file uploaded to Revenue should have a Sequence ID of 0001, and this number should be incremented for each individual file uploaded. The sequence number must be unique within each FATCA year.
Example:	AB012R.00001.ME.372.2015_0001 Where AB012R.00001.ME.372 = Reporting FI GIIN 2015 = Reporting Year 0001 = This is the first file that this FI has uploaded to Revenue

7.2 Alternative MessageRefID Naming Convention

Element	MessageRefID
Datatype:	xsd:string
Pattern:	<TimestampWhenMessageCreated>_<ReportingFIGIIN>
Description:	<ul style="list-style-type: none"> • <TimestampWhenMessageCreated> Timestamp when the message is created in the format: YYYYMMDDTHHMMSSZ • Underscore character (_) • <ReportingFIGIIN> is the GIIN for the reporting FI associated with the reporting group
Example:	20160226T093830Z_AB012R.00001.ME.372 Where 20160226T093830Z = TimestampWhenMessageCreated AB012R.00001.ME.372= ReportingFIGIIN

7.3 XML Schema element reference – DocRefID

The IRS recently issued guidance in relation to the format for this field and the format should be applied to filings made from 2016 onwards. As is the case with the MessageRefID element, every record, inside every FATCA XML file submitted by an FI should have a unique value in this field. The following format is required by Revenue for standardised DocRefID's:

Element	DocRefID
Datatype:	xsd: string
Pattern:	<MessageRefID>_<Record Sequence Number> Note: This pattern conforms to the IRS Schema Guidance
Description:	<ul style="list-style-type: none"> • <MessageRefID> is the MessageRefID of the file in which the record appears – format for this outlined above • Underscore (_) • <Record Sequence Number> is a unique 10-digit sequence id that uniquely identifies the record within a particular file. For Example – the 5th record in a particular file should have Record Sequence number 0000000005

7.5 XML schema element reference – BirthDate

Reporting FIs should include a date of birth if a U.S. TIN is not available for a U.S. resident account holder or substantial owner. The date of birth must be properly formatted per IRS Publication 5124 and placed in the Birth Info/Birthdate sub-element of the Accountholder or Substantial Owner element, as appropriate. If a date of birth is provided in lieu of a TIN, in line with IRS Notice 2017-46, filers should include a string of nine consecutive capital letter “A”s (“AAAAAAAAA”) in the TIN sub-element for the Accountholder or Substantial Owner element. This TIN should be marked with the “issuedBy” attribute set to “US”.

7.6 XML schema element reference – TIN

A value for a TIN data element must be either in a GIIN format or in one of the following formats for a U.S. TIN to be considered valid:

- Nine consecutive numerical digits without hyphens or other separators (e.g., “123456789”)
- Nine numerical digits with two hyphens, one hyphen entered after the third numeric digit and a second hyphen entered after the fifth numeric digit (e.g., “123-45-6789”)
- Nine numerical digits with a hyphen entered after the second digit (e.g., “12-3456789”)

The Account Holder TIN must be provided and cannot be blank characters in the TIN data sub-element. If an individual or entity Account Holder does not have a TIN, enter nine consecutive capital letter “A”s (“AAAAAAAAA”) in the TIN data sub-element, otherwise you will receive an error message. The former TIN placeholder of 9 zeros (“000000000”) will no longer be accepted in the FATCA XML file. The “issuedBy” attribute of the TIN should be populated with a value of “US” for a US TIN.

Sequencing of TIN’s: If supplying multiple TIN numbers – i.e: an Irish TIN and a US TIN for an Account Holder, the US TIN should be the first TIN that appears in the record. It should be noted that the inclusion of a valid US TIN is **mandatory** for all accounts from 2017 except in cases covered by **IRS Notice 2017-46** i.e. for individual account holders that meet the criteria in the Notice, but not for entity account holders.

From 2020, a US TIN is **mandatory** for all accounts as the exception noted in **IRS Notice 2017-46** will no longer apply.

If an Account Holder does not have a TIN, you may continue to enter nine consecutive capital letter "A"s ("AAAAAAAAA") in the TIN data sub-element, however doing so will now cause you to receive an error message.

The error notice will provide 120 days to correct the issue.

After the 120 days if the issue is not resolved the IRS will not, in the case of an individual account, automatically conclude that there is significant non-compliance; however, at this stage the IRS will take account of the facts and circumstances leading to the absence of the TIN, such as the reasons why the TIN could not be obtained, whether the FI has adequate procedures in place to obtain TINs and the efforts made by the FI to obtain them.

7.7 XML schema element reference – FilerCategory

Filer Category is mandatory, either on the sponsor or in the ReportingFI element.

If a Sponsor is present, the Sponsor element must contain a FilerCategory and the ReportingFI element must not. If a Sponsor is not present, the ReportingFI must contain a FilerCategory.

Please refer to [FATCA XML Schema Guide \(V2.0\)](#) for further guidance.

7.8 Character Encoding

All FATCA files should be character encoded UTF-8 without Byte Order Marker (BOM).

7.9 ROS Valid Characters

Only the following characters are permitted:

a b c d e f g h i j k l m n o p q r s t u v w x y z
A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
0 1 2 3 4 5 6 7 8 9
á é í ó ú Á É Í Ó Ú
£ \$ % & * - + = () < > ; , . " ' @ ~ # ? ! / \

Please note that, while # is a valid character for ROS, it is not however valid for the FATCA schema and should not be used.

7.10 FATCA XML forbidden and restricted characters

If a FATCA XML file contains one or more of the following characters, their presence will cause the file to be rejected. These characters should be replaced by the following predefined entity references to conform to XML schema best practices.

Character	Description	Entity Reference
&	Ampersand	&
<	Less Than	<

If a FATCA XML file contains one or more of the following characters, their presence will not cause a file error. However, it is recommended that the characters are replaced by the following predefined entity references to conform to XML schema best practices.

Character	Description	Entity Reference
>	Greater Than	>
'	Apostrophe	'
"	Quotation Mark	"

If a FATCA XML file contains one of the following combinations of characters, the file will be rejected. These combinations of characters are not allowed. To prevent file errors, please do not include any of these combinations of characters.

Character	Description	Entity Reference
- -	Double Dash	N/A
/*	Slash Asterisk	N/A
&#	Ampersand Hash	N/A
