5. Appendix I – ROS Registration & Reporting Entity Registration

5.1 Register for ROS

This step is only relevant if the Customer is not already registered for ROS.

The Customer must register for ROS using the Tax Registration Number provided by Revenue. If the Customer does not have a Tax Registration Number but has a DAC2-CRS Reporting Obligation in Ireland please see Section 5.2 in order to obtain a Reporting Entity Number.

Details on how to register for ROS are available on the Revenue website.

For queries relating to ROS please contact the Revenue ROS Technical Helpdesk:

- Email at roshelp@revenue.ie
- Telephone at 01 738 3699, International customers may contact via the email address above or call +353 1 738 3699
5.2 Register as a Reporting Entity

This is a Customer that is only being registered with Revenue in order to file reporting obligations (i.e. they have no tax obligations in Ireland).

If the Customer does not have a Tax Reference number and is not registered for ROS, but is obliged to fulfil a DAC2-CRS Reporting Obligation, the Customer must register with Revenue as a ‘Reporting Entity’. This process should not be confused with a Tax Registration. Where a Customer registers as a Reporting Entity, it will only be able to fulfil its DAC2-CRS Reporting obligations, that is, it is not required to file tax returns e.g. Corporate Tax returns.

In order to register as a reporting Entity, the Customer must contact VIMA on +353 42 9353337. The Customer will be issued with a Reporting Entity Registration Number, which will be in the format of 7 digits followed by 2 letters (e.g. 1234567AA).
6. Appendix II – Agent Creating Reporting Entity Number

6.1 Creating a Reporting Entity as an Agent

A Reporting Entity is created only in cases where the Customer has no tax obligations in Ireland, but needs to register with Revenue in order to fulfil their reporting obligations.

If the Customer does not have a Tax Reference Number and is not registered on ROS but is obliged to register on ROS to fulfil a DAC2-CRS Reporting Obligation, the Agent must register the Customer with Revenue as a ‘Reporting Entity’. This process should not be confused with a Tax Registration. Where a Customer is registered as a Reporting Entity, the Customer will only be able to fulfil its DAC2-CRS Reporting obligations, that is, the Customer is not required to file tax returns e.g. Corporate Tax returns. Where a Client already has an Irish Tax Registration Number or Reporting Entity Number, this option should not be used as it will create duplicate filing obligations.

When an Agent is registering a Customer as a Reporting Entity for DAC2-CRS Reporting purposes, it is possible for an Agent to register a DAC2-CRS Reporting Obligation at the same time. The process is set out in steps 6.1.1 to 6.1.12 below.

For queries relating to ROS please contact the ROS Technical Helpdesk:

- Email at roshelp@revenue.ie
- Telephone at 01 738 3699, International customers may contact via the email address above or call +353 1 738 3699

For queries relating to registering a Reporting Obligation, please contact Revenue’s VIMA (VIES, Intrastat and Mutual Assistance) office:

- Via MyEnquiries, selecting AEOI (Automatic Exchange of Information) and DAC2-CRS
- Telephone at +353 42 9353337

- <FI_Revenue_customer_number> FI’s Revenue customer number (Tax number or Reporting Entity registration number)  
- ‘MS’ indicates that this is a MessageRefID

In circumstances where MessageRefIDs are generated by disparate systems within a Financial Institution, and the MessageRefIDs are for use in messages that are to be submitted to Revenue, the MessageRefIDs should include a unique identifier for their system of origin within the <FI_Message_uid> element in order to ensure uniqueness of the MessageRefID. Financial Institutions may submit multiple messages to Revenue, for example a message may be submitted for each department or book of business in operation at the Financial Institution and the inclusion of a unique identifier for the system of origin will ensure the uniqueness of the MessageRefID within the namespace for that Financial Institution. Note: the term ‘message’ refers to what is also often called a ‘file’ or a ‘return’. |

### 7.1.2 FI DocRefID format for use within the ReportingFI Element

<tr>
<td>Datatype:</td>
<td>xsd:string</td>

<tr>

<td>- ‘FI’ indicates that this is a DocRefID for use within the ReportingFI Element</td>
</tr>
<tr>
<td></td>
<td>- <code>&lt;ReportingFI_uid&gt;</code> A unique id for each ReportingFI Element. This could be a sequential number or a timestamp or another unique identifier of the FI’s choosing.</td>
</tr>
</tbody>
</table>

In circumstances where DocRefIDs are generated by disparate systems within a Financial Institution, and the DocRefIDs are for use in messages to be submitted to Revenue, the DocRefIDs should include a unique identifier for their system of origin within the `<ReportingFI_uid>` element in order to ensure uniqueness of the DocRefID. Financial Institutions may submit multiple messages to Revenue, for example a message may be submitted for each department or book of business in operation at a Financial Institution and the inclusion of a unique identifier for the system of origin will ensure the uniqueness of the DocRefID within the namespace for that Financial Institution.
### Examples:

**Example 1** DocRefID within the ReportingFI Element is a sequential number

**DocRefID for first message sent by an FI**

20163346602FHI0000000001

- 2016 is the year of the reporting period
- 3346602FH is the FI’s Revenue customer number (Tax number or Reporting Entity registration number)
- FI indicates that this is a DocRefID for use within the ReportingFI Element
- 0000000001 is the unique id for the ReportingFI Element

Where a subsequent message is sent by the FI to correct details within the ReportingFI Element, a new DocRefID within the ReportingFI Element should be included. The format of the DocRefID, using a sequential number, should be as follows:

20163346602FHI0000000002

FI indicates that this is a DocRefID for use within the ReportingFI Element

1472142039115 is the unique id for the ReportingFI Element

Example 3 DocRefID within the ReportingFI element is generated from disparate systems within a FI and using a sequential number

FI indicates that this is a DocRefID for use within the ReportingFI Element

SysA indicates that this message was generated by System A

0000000001 is the unique id for this ReportingFI Element

Where a subsequent message is sent by the FI from ‘System A’, correcting a detail within the ReportingFI Element according to the correction process and including a new DocRefID within the ReportingFI Element, the DocRefID (using a sequential number) should be as follows:
