1. Introduction

This guidance sets out the VAT arrangements that apply to intra-EU transactions involving farmers.

2. Definition of a flat rate farmer for VAT purposes

For VAT purposes a flat-rate farmer means a person who engages in at least one of the agricultural production activities in the State listed in Appendix 1 and whose supplies consist exclusively of either or both;

1. agricultural produce (see Appendix 1)
2. agricultural services (see Appendix 2)

or

whose supplies consist exclusively of either or both agricultural produce and/or agricultural services and of one or more of the following:

- machinery, plant, or equipment which he or she has used for his or her farming activity;
- racehorse training services for which the annual turnover does not exceed and is not likely to exceed €37,500;
- goods, other than those referred to above, for which the annual turnover does not exceed and is not likely to exceed €75,000 or services, other than those referred to above, for which the annual turnover does not exceed and is not likely to exceed €37,500.

In brief therefore, a person who engages in agricultural production, and whose turnover from non-agricultural activities does not exceed the appropriate annual threshold, is a flat-rate farmer, i.e. a farmer who is not obliged to register for VAT in respect of his or her farming activities.

3. Obligation to register

A farmer is no longer a flat rate farmer and is obliged to register where:

1. his or her annual turnover from agricultural contracting activities other than insemination services, stock minding and stock rearing, exceeds or is likely to exceed €37,500.
2. his or her annual turnover from sales of bovine semen other than to other farmers licensed as an artificial insemination center or supplies to a person over whom the farmer exercises control, exceeds or is likely to exceed €75,000.
3. his or her annual turnover from retail sales of horticultural products exceeds or is likely to exceed €75,000.
4. his or her annual turnover from supplies of agricultural services, other than insemination services, stock minding or rearing, and either or both bovine semen or nursery stock exceeds or is likely to exceed €37,500.
5. he or she is in receipt of services which are taxable where received (New Intra-Community VAT Rules on Place of Supply for Services).
6. his or her annual turnover from sales of bovine semen and retail sales of nursery stock exceeds or is likely to exceed €75,000.
7. his or her annual turnover from intra-Community acquisitions exceeds or is likely to exceed €41,000.
8. his or her annual turnover from taxable goods or services, other than any exclusions mentioned above, exceeds or is likely to exceed the appropriate thresholds.

If a farmer is obliged to register under 3.5 or 3.7 above such registration is effectively ‘ring fenced’ to the intra-Community acquisitions or services which are taxable where received. He or she is not obliged to register in respect of his or her farming activities.

A flat-rate farmer receiving services (including intra-Community goods transport) which are taxable where received is required to register for VAT in respect of these services regardless of their cost to him or her of acquiring those services. There is no threshold in respect of such services. The requirement to register in respect of such services does not affect the farmer’s flat-rate status but it does make him or her liable to VAT in respect of intra-Community acquisitions of goods, even if the €41,000 threshold is not exceeded.

A farmer who is not required to register and account for VAT in respect of the acquisition of goods form other Member States (intra-Community Acquisitions), as outlined in paragraph 4 above, will pay VAT as appropriate in the Member State where those goods were purchased. Where a flat-rate farmer is required to account for VAT on intra-Community Acquisitions in this State, that farmer should provide his VAT registration number to the supplier in the other Member State, to ensure that he is not charged VAT on the purchase in that other State.

Where a flat rate farmer registers in respect of racehorse training the registration may be isolated and he or she will remain a flat rate farmer in respect of his or her farming activities.

4. Option to register

A flat-rate farmer who is not obliged to register for VAT may elect to do so. Where a flat-rate farmer elects to register for VAT, that farmer will account for VAT on taxable supplies subject to the normal provisions applying to accountable persons.

5. Flat-rate farmers and the flat-rate addition

A flat-rate farmer is a farmer who is not registered for VAT in respect of his or her farming activities. To compensate for VAT paid on supplies to him or her, such a farmer is entitled to a flat-rate addition to the prices at which his or her agricultural produce or agricultural services are supplied to VAT-registered persons including marts, agricultural co-operatives and meat factories. A flat-rate farmer may also be entitled to reclaim VAT incurred in respect of the construction, extension, alteration or reconstruction of farm buildings, and land drainage, from the VAT Repayment (Unregistered) Section.
6. Sales of agricultural produce by flat-rate farmers to persons who are registered for VAT in other Member States

The flat-rate addition which applies to supplies of agricultural produce within the State also applies to supplies made to VAT-registered traders in other Member States.

The VAT-registered person in the other Member State who buys the goods should, in order to obtain a refund of the flat-rate addition, be in possession of an invoice showing separately the purchase price of the goods and the flat-rate addition. This invoice, which is normally prepared by the purchaser, must be signed by the flat-rate farmer who must retain a copy of the invoice. A flat-rate farmer who is registered under paragraph 3.5 or 3.7 above should treat such sales in the same way and should not include his or her VAT number on the invoice in order to avail of his or her entitlement to the flat-rate addition. The purchaser of the goods in the other Member State may reclaim the flat-rate addition. See Revenue information on Repayments to Unregistered Persons for procedures for claiming repayment.

7. Distance sales

Special rules apply in the case of ‘distance sales’. Distance sales are where a supplier in one EU Member State sells goods to a person in another Member State who is not an accountable person for VAT and where the supplier is responsible for the delivery of the goods. Farmers should be aware of these rules because the practical effect is that they may have to register for VAT in respect of such supplies in another Member State.

Briefly, the position is that a flat-rate farmer who makes distance sales in excess of an annual threshold to another Member State is obliged to register for and charge VAT in that other Member State. Under EU VAT arrangements, Member States are required to adopt a distance sales threshold of either €35,000 (or the equivalent in national currency) or €100,000 (or equivalent). Farmers should contact the tax authorities in the other EU Member States to establish the appropriate threshold there.

8. Refunds on farm building work, etc.

Under an existing Refund Order, a flat-rate farmer may recover the VAT paid by him or her in respect of farm buildings and structures and land drainage by completing claim form VAT 58 and returning it, with the supporting invoices, to VAT Repayments Section. See Revenue information on How to reclaim VAT on farm buildings.

Where a flat-rate farmer is registered for VAT in respect of intra-Community acquisitions and/or certain services received from abroad (see paragraph 3.5 and 3.7) he or she is still entitled to a refund under the Order. However, the refund must be claimed as a deduction through periodic VAT returns and not be means of the VAT 58 form.
9. Livestock brought into the State from another Member State

Temporary importation schemes apply, under Customs legislation, in relation to the import of livestock into the State from outside the EU. Where livestock are brought into the State from other Member States in similar circumstances an intra Community Acquisition will not be considered to have occurred. The conditions in relation to these schemes include:

- No transfer of ownership of the livestock has taken place, and
- The livestock do not remain in the State for a period in excess of two years

Where livestock are brought into the State from another Member State for the purpose of having a service or treatment carried out on them (e.g. veterinary services) an intra-Community acquisition does not arise and the service may be liable to Irish VAT.

10. Livestock sent from the State temporarily to another Member State

Where the circumstances set down in paragraph 9.1 apply in reverse regarding livestock sent temporarily from the State to another Member State, the person who dispatches the livestock from the State must maintain a record showing details of the goods and the name, address and VAT number (if any) of the person to whom they are sent.

11. New means of transport

There are special rules concerning the intra-Community acquisition of new means of transport. The person acquiring the new means of transport must always account for VAT in the Member State of destination of the goods.

**Definitions of 'new means of transport' for VAT purposes**

<table>
<thead>
<tr>
<th>Means of Transport</th>
<th>Specification</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motor Vehicle</td>
<td>over 48 cc or over 7.2. kw power</td>
<td>6 months old or less, or travelled 6,000 km or less</td>
</tr>
<tr>
<td>Boat</td>
<td>over 7.5 meters in length</td>
<td>3 months old or less, or sailed for 100 hrs. or less</td>
</tr>
<tr>
<td>Aircraft</td>
<td>over 1,550 kg take-off weight</td>
<td>3 months old or less, or flown for 40 hrs. or less</td>
</tr>
</tbody>
</table>

If a flat-rate farmer acquires a new motor vehicle in another Member State, VAT must be paid on this vehicle at the time of its registration in the State.
In the case of intra-Community acquisitions of new boats and aircraft, the VAT due must be paid to the local Collector of Customs & Excise on arrival of the boat or aircraft in the State. However, the acquisition of a new means of transport will not affect the flat-rate status of the farmer and the value of the new means of transport will not be included in the value of intra-Community acquisitions for the purpose of determining whether a farmer is required to register for VAT in respect of those acquisitions.

Agricultural plant and machinery, including tractors, are not regarded as a new means of transport for VAT purposes and are taxed under the normal rules for intra-Community transactions, i.e. acquisitions of plant and machinery are treated as intra-Community acquisitions for the purpose of determining whether a farmer must register (see paragraph 8).
Appendix 1

- **Crop Production**
  1. General agriculture, including viticulture
  2. Growing of fruit (including olives) and of vegetables, flowers and ornamental plants, both in the open and under glass
  3. Production of mushrooms, spices, seeds and propagating materials
  4. Running of nurseries

- **Stock Farming together with Cultivation**
  1. General stock farming
  2. Poultry farming
  3. Rabbit farming
  4. Beekeeping
  5. Silkworm farming
  6. Snail farming

- **Forestry**
- **Fisheries**
  1. Fresh-water fishing
  2. Fish farming
  3. Breeding of mussels, oysters and other molluscs and crustaceans
  4. Frog farming

Where a farmer, processes, using means normally employed in an agricultural, forestry or fisheries undertaking, products deriving essentially from his agricultural production, such processing shall also be regarded as agricultural production.
Appendix 2

Supplies of agricultural services which normally play a part in agricultural production shall be considered the supply of agricultural services, and include the following in particular:

- field work, reaping and mowing, threshing, baling, collecting, harvesting, sowing and planting.
- packing and preparation for market, such as drying, cleaning, grinding, disinfecting and ensilage of agricultural products.
- storage of agricultural products.
- stock minding, rearing and fattening.
- hiring out, for agricultural purposes, of equipment normally used in agricultural, forestry or fisheries undertakings.
- technical assistance.
- destruction of weeds and pests, dusting and spraying crops and land.
- operation of irrigation and drainage equipment.
- lopping, tree felling and other forestry services.
