25. The proposal aims to embed taxation directly into how you get paid by the DW. How beneficial do you think this would be for your business?

Of no significant benefit. At present I pay preliminary tax in the current year which is generally in line with what is due with a small balancing payment in the following year to finalise.

- 26. Where you are an SP operating as an individual worker, the proposal aims to implement personalised deduction rates (PDR), which means you will pay tax on your income as you go, similar to how employees are taxed under PAYE. What impact do you think PDR will have on your cashflow and financial management?**

No significant issue in that I generally manage cashflow in a manner to enable me pay taxes as they fall due.

- 27. Do you think this new regime, including the PDR will have a positive effect on your end of year Income Tax return filing and preliminary tax payment obligations?**

I do not think it will have any significant impact.

- 28. The accuracy of PDR is improved by the regular reporting by you to Revenue of your income and business expenses. How likely are you to report your income and expenses to improve the accuracy of your PDR?**

Not likely to change beyond what I do at present when income and expenses are reported on a two monthly VAT return with an annual return submitted to finalise.
