1. Introduction

The purpose of this document is to provide information on the commitment to quality activities and procedures Revenue has put in place in respect of the production of Revenue Statistics to comply with the Irish Statistical System Code of Practice (ISSCOP).¹

This dataset provides a distribution of Income Tax by Type of Gross Income, Range of Gross Income, Marital Status, Year and Statistic for the years 2004 to 2014.

The information on personal incomes which is given in this dataset has been collected in the course of the administration of income tax for the income tax years in question

The tables relate to income assessed in respect of the years_by reference to tax returns which were processed, usually in the second quarter of the year following the returns due date. Thus for example returns in respect of the 2012 accounting period will have been due in Q4 of 2013 and will be processed in Q2 of 2014.

The information relating to employees from whose income tax was deducted under Pay As You Earn is based on completed end-of-year returns from employers of which up to 96% were processed at the relevant time. The information relating to Schedule D assessments is based on assessed Self-Assessment Returns for the year usually representing some 83.0% of the expected total.

Proprietary directors, while formally taxed under the PAYE system, are akin to the self-employed and should be taken into account when analysing the income distribution of the self-employed sector generally.
