Code	Functional Description	Technical Description	Error Message
B1000	Export followed by Transit & Groupage: During the Transitional Period, in case of "Export Followed by Transit" with multiple export declarations covered by one standard transit declaration (i.e. not a pre-lodged transit declaration), the D.G. PREVIOUS DOCUMENT at CONSIGNMENT ITEM level can include the MRN of the related Export declaration (maximum one Export MRN included per one Consignment item).	N/A	Maximum one Export MRN included per one Consignment item
B1016	During the Transitional Period, the data item "Customs office at border reference number", is required for 'native CC015C' and 'native CC013C' and optional if CC013C or CC015C is the outcome of the upgraded CC013B or CC015B respectively. After the end of the Transitional Period, the data item will be always required.	N/A	Customs Office at Border reference number is required
B1091	During the Transitional Period (TP), the native CC015C, CC013C and CC170C sent to the National Transit Application should not include the value '99'. This value '99' is valid in CL750 during TP, only in case the value '99' is the result of the upgrade by the National Transit Application of a legacy message (e.g. CC015B upgraded into CC015C).
